EPHRHD SERIES

EPHRHD & EPHRHD PER & EPHRHS

Proportional metering pumps driven by internal control instruments for pH and Redox.

This compact, easy to install system is ideal for measuring, regulating and dosing acids, alkalis or disinfectant (chlorine) into small to medium sized swimming pools.

EPHRHD MODEL

Swimming pool digital proportional regulator with metering pumps for acid (pH) and disinfectant (ORP). Stand-by input, level control for each pump. Two operating modes: mode 1, simultaneous feeding; mode 2, acid pump On and chlorine pump Off till pH stabilization and then chlorine feeding. Metering pumps flow rate: 5 l/h with 5 bar of back pressure.

EPHRHS MODEL

Swimming pool digital proportional regulator with metering pump for acid (pH) and proportional/On-Off (disinfectant) electrovalve for feeder application. Stand-by input, level alarm control only for acid. Metering pump flow rate: 5 l/h with 5 bar of back pressure.

EPHRHD PER MODEL

Digital proportional regulator for swimming pool with peristaltic pumps for acid (pH) and disinfectant (ORP). Pumps capacity: 1bar - 2,5l/h.
